

LOHITH G

COMPUTER SCIENCE STUDENT | FULL STACK DEVELOPER

Motivated Computer Science student passionate about building modern, responsive web applications that solve real-world problems. Proficient in full-stack development with experience designing database systems, technical layouts, and cognitive workflows.

PROJECTS

College Web Portal (Calmstack Hackathon Winner)

Next.js, React, TypeScript, Tailwind CSS, Vercel

- Architected and deployed a high-speed college portal directory during a 48-hour sprint.
- Migrated page component structures to Next.js App Router to optimize static page rendering speeds.
- Configured responsive database lookup routes and client filter tables for course searches.
- Awarded First Place out of competing developer teams for clean layout and edge load performance.

Librarium — Digital Library System

FastAPI, SQLite, React, Google Gemini Vision API, Open Library API

- Developed an intelligent book logging system with Vision AI page cover identification rules.
- Integrated Google Gemini 2.5 Vision API to automate title and ISBN metadata extraction from images.
- Coded partial and fuzzy-tolerant book queries using difflib algorithm search matching.
- Implemented secure JWT authentication credentials and custom role-based admin menus.

MediMind — Medicine Reminder Website

React, Node.js, Express.js, MongoDB, JWT, bcryptjs, Tailwind CSS

- Built a secure full-stack reminder web application to help patients manage daily medicine intakes.
- Engineered JWT authentication workflows and secure database storage using bcrypt password hashing.
- Programmed custom tracker controls allowing users to log medicine statuses (Taken/Missed/Skipped).
- Designed a responsive patient dashboard layout rendering active charts, dates, and timing filters.

EDUCATION

Mahalad College of Engineering

2023 – 2027

Bachelor of Engineering in Computer Science

- CGPA: 8.0 / 10

Brilliant PU College

2021 – 2023

Pre-University Science Stream (PCMB)

- Grade: 93%

Portfolio

lohithg-15.github.io/my-portfolio/

SKILLS

Languages

JavaScript, HTML, CSS,
Python, TypeScript

Frontend

React.js, Next.js, Tailwind CSS,
Bootstrap

Backend

Node.js, Express.js, FastAPI,
REST APIs

Database

MongoDB, SQLite, Mongoose

Tools & Others

Git, GitHub, Gemini API, Postman,
JWT, VS Code

ACHIEVEMENTS

- Won First Place in the Calmstacks online hackathon (June 2026).
- Successfully built full-stack projects solving real-world problems.
- Actively maintaining open-source repositories and packages on GitHub.
